SUMMARY

I am an enthusiastic Unity Developer with over 2.5+ years of experience and a solid background in game development and virtual reality technologies. I am driven by innovation and keen on exploring cutting-edge technologies like AR/VR and AAA games. My goal is to leverage my skills in Unity and C# to create engaging experiences that push the limits of immersive technology.

TECHNICAL SKILLS

C#, Python, C, Unity Engine, AR/VR, 3D, Git, Plastic SCM, MySQL, Visual Studio, Meta Quest, HTC Vive device

PROFESSIONAL EXPERIENCE

Unity Developer | CHRP-India, Hyderabad

(Nov 2024 – Jan 2026)

Developing interactive VR simulations and training applications using Unity and C#, while collaborating with cross-functional teams to meet client requirements and continuously advancing expertise in XR technologies through proactive self-learning.

❖ Client: TPWODL

- Developed an interactive 20+ VR simulation for TPWODL (Tata Power Western Odisha Distribution Limited), enhancing training and visualization of electrical distribution systems using real-time 3D environments and immersive user interactions.
- Led development of a VR simulation for TPWODL using Unity, C#, and Oculus SDK, HTC Vive, enabling immersive training in power distribution operations and improving engagement through interactive, real-world scenarios.

❖ Client: POSCO

- Developed and deployed 7+ VR-based industrial safety training simulations for using Unity, C#, and Unity XR, enabling immersive, scenario-based training in high-risk industrial operations.
- Led VR simulation development with a focus on XR interactions, real-time performance optimization, and immersive user experience, delivering production-ready enterprise training solutions.
- Converted industrial SOPs into scalable XR training solutions and handled end-to-end VR development.

Software Developer | cxr.agency, Pune

(Sep 2022 – Feb 2024)

Proactively enhance Unity development skills through dedicated self-learning and online courses, staying abreast of industry trends. Looking forward to leveraging acquired skills for impactful contributions to forward-thinking Unity projects.

❖ DEG Arena (virtual meeting in VR)

- It's a virtual workspace that allows users to create lifelike avatars and work closely together, sharing content and collaborating as if in an actual meeting room.
- Led dynamic UI development with scripted deployment, optimizing user experience. Integrated external APIs for expanded project functionality and real-time data incorporation.

❖ RETTER AR - <https://play.google.com/store/apps/details?id=com.WEBER.RETTERAR>

- Developed a cross-platform Augmented Reality (AR) training application in Unity, leveraging ARKit (iOS) and ARCore (Android) to enable real-time object placement and environmental interaction through surface scanning.
- Designed and implemented four interactive accident simulations, including car and truck crash scenarios, to enhance situational awareness and training outcomes.
- Built and deployed the application for both iOS and Android, ensuring broad accessibility and consistent AR performance across platforms.

EDUCATION

B.E (Electrical)	Sant Gadge Baba Amravati University percentage - 76.22%	2018 - 2021
DIPLOMA	P R Patil Institute Polytechnic of Amravati percentage - 67.45%	2016 - 2018

PERSONAL DETAILS

- Nationality : Indian
- Date of Birth : 31st Dec 1998
- Gender : Male

This is to state that the information given above is true and correct to my knowledge and understanding.
